What you need:

Ships (I use 1:1400 scale, but anything smaller will work fine, with larger scales you might want to increase ranges)

Dice, several D6 will work

Measuring tape, in inches

A Playing surface, 4'x4' works nicely, although larger the better, generally.

How the game goes:

A ship is by definition any object in space. Space docks, shuttles, and asteroids are ships. Planets are not. Planets will have their own special rules.

Each ship has an initiative value. This is $(M / 10) + (S) +$ a roll of D6. This determines the initiative for the entire battle. The ship with the highest initiative goes first, the second highest second and so on. During a ship's turn they can move and fire in any order or perform any other actions they have (i.e. cloak).

A ship is comprised of several values. These are: *Shields, Hull, Phasers, Torpedoes, Speed, Maneuverability, and specials*. Specials include things like cloak and separate

Here's an explanation of various things:

Shields

Each damage takes it down by one point or more. Each facing of the ship has the Shield rating. Every turn you get 5 points to distribute to facings that need it. You cannot go over your original rating.

Hull

After the shield rating is brought down to 0, and you get hit on that facing you start taking hull damage. Every point of damage on the hull you have to roll 2D6. On a roll of 12 you roll on the critical damage table. Every point of damage under 10 adds one to the roll.

Phasers

Phasers are less effective at longer ranges. From **1 - 45** inches damage is as below. From **46-60** inches there is a **-1** to all damaged caused. From **61-85** inches there is a **-2** to all damaged caused. **Phasers cannot hit targets farther than 85 inches.** When you hit (see hitting below) you roll the number of dice according to the number of phasers on that facing. If the amount is over, and the target has shields you bring down the shields the amount over the rating. Other wise you just do one damage if you do not beat the roll or are hitting the hull.

Torpedoes

Photon Torpedoes have a range of 70 inches. Advanced and Quantum torpedoes have a range of 80 inches. Over half range the torpedoes have a -1 to hit. To fire you chose what type of spread: single, dual, or quad, then apply the modifiers and roll to hit. If you hit then you roll the number of dice equal to the number of torpedoes hit. If this exceeds the shields, or in case of shields down the hull, then it does the amount of damage over the rating. Otherwise, it does one damage. It takes one of your turns to reload a torpedo that was fired. A single spread uses one torpedo per shot, has a +1 to damage rolls, but a -1 to hit rolls. A dual spread uses two torpedoes, an has no modifiers. A quad spread uses four torpedoes, has a -1 to damage rolls and a +1 to hit rolls.

Speed

This is the total amount of movement in inches a ship can do per turn.

Maneuverability

The number of total degrees a ship can pivot in a turn.

Cloak

When activated you may not move or fire that turn. Until it is deactivated you may move, but not fire and cannot be fired upon. You must spend a turn to deactivate it. While activating, using, or deactivating all your shield ratings become 0 and your next turn after you deactivated the cloak will return to pre-cloak levels.

Firing at your target

The side that is facing the opponent (fore, aft, side) is the firing facing. The side that is facing you (fore, aft, side) is the receiving facing. These facings can fire and take damage.

There are modifiers on hitting an enemy ship:

If its maneuverability is less than 100 degrees, there is no modifier.

If its maneuverability is greater than 100 degrees, but not greater than 200 degrees phasers need a 3+ on a D6 to hit and torpedoes have a -1 to hit.

If its maneuverability is greater than 200 degrees, but not greater than 300 degrees phasers need a 4+ on a D6 to hit and torpedoes have a -2 to hit.

If its maneuverability is greater than 300 degrees, phasers need a 5+ on a D6 to hit and torpedoes have a -3 to hit.

These are not cumulative.

This means faster and more maneuverable ships will be harder to hit.

Critical Hits

Every time a 12 or greater is achieved after hull damage; there is a critical hit. Each subsystem has 5 points of damage to soak up until it is destroyed.

The different subsystems are:

Cloak: if damaged or destroyed a ship cannot cloak.

Phasers: each point of damage means a -1 to all damage rolls from phasers, if destroyed then you may no longer fire any phasers.

Sensors: if damaged a ship's range is half for all its weapons. If destroyed range is $\frac{1}{4}$ and all damage rolls are -3.

Torpedoes: each point of damage is a -1 to hit, if it is destroyed then you may no longer fire torpedoes and must roll again on the critical chart. (BOOM!)

Impulse Engines: each point of damage reduces 10% from the speed of a ship and maneuverability. If they are destroyed you may only pivot 10 degrees.

Shield Generator: each point of damage reduces the amount the shields may regenerate by one point. If it is destroyed you may no longer regenerate shields.

Warp Core: every point of damage reduces the amount of shield regeneration by one, the amount of torpedoes that may fire per turn by one, the amount phasers may fire by one, and the speed by 10%. If this is destroyed the ship will suffer a warp core breach and be disabled.

Bridge: Every point of damage reduces the to-roll hits by -1 and the movement by -10%. If this is destroyed so is the ship.

Repair

Every turn a ship gets three rolls, roll separately:

Every 6 you can put one point in a destroyed system, except for bridge and warp core.

Every 5+ you can put two points in any damaged system or combination of damaged systems

Every 4+ you can put one point in any damaged system.

Below a 4 you get no points.

Sub-systems

5 points in each system.

2	Cloak damaged; if no cloak present re-roll
3	Phases damaged
4-7	Sensors damaged
8	Torpedoes damaged
9	Impulse Engines damaged
10	Shield Generator damaged
11	Warp core damaged
12	Bridge Damaged

Campaigns

Each player starts with 300 points to build his/her starship, through succeeding missions and defeating opponents their ships and possible fleets will grow.

Missions and Captains

Captains have four attributes:

Diplomacy
Tactical
Engineering
Science

These represent not only the captain's abilities, but his ability to manage his crew.

You start out with 8 points to distribute between the attributes. 0 is the lowest and 4 is the highest

Picard, Janeway, Kirk, and Sisko would all be 4's across the board!!

As you grow in power and resources you will get more points to spend. You may trade in your old ship and add that to your current amount of points. You cannot transfer any special advancement from the old ship. The new ship will be just that, new. If you have more than one ship, chose your flagship. This ship will gain any bonuses from having you aboard. The other ship will not get bonuses from your captain.

Missions

There are several types of missions, to complete them you must pass all tests required in the mission explanation. If you fail it's the end of your turn.

Each captain may attempt as many missions until they fail a mission, then the other person goes. To determine who goes first roll a dice, whomever rolls highest gets to chose first or second.

Initial Mission Chart

Roll	Type	Explanation
1	Exploring	Roll on the exploration mission chart. An opponent may choose whether to attack or not.
2	Research	Roll on the research mission chart. An opponent may choose whether to attack or not.
3	Delegating	Roll on the delegation mission chart. An opponent may not attack you on this mission.
4	Escorting	Roll on the escort mission chart. An opponent may choose whether to attack or not.
5	Defending	One opponent must attack. Randomly decided.
6	Attacking	You must attack an opponent. Your choice.

After every five missions completed successfully you role on the advancement chart, note certain missions will award bonuses above these.:

Advancement Chart

Roll	Type	Explanation
1-2	Captain Advance	The captain gains one point in one attribute of your choice.
3-4	Sway	You gain 50 points and may chose your next mission.
5	Firepower	Your phasers are increased by one.
6	Engine Increase	Chose +10% to speed or maneuverability.
7-8	Resources	You have now 100 more points at your disposal.
9	Shielding	Your shields have increased by one.
10	Hull Reinforcement	Your hull has increased by one.
11-12	Captain Advance	The captain gains one point in one attribute of your choice.

SHIP RECORD SHEETS

The Nova class, USS Equinox.
Hull rating of: 11 .
Shield Rating of: 5 .
Phaser ratings of: [F]5[S]3[R]2
Torpedo ratings of: [F]1[R]1
It has quantum torpedoes
Its speed in inches is: 18
Its maneuverability is: 150
Its total point cost is: 300

The Soverign class, USS Enterprise
E.
Hull rating of: 40
Shield Rating of: 16 .
Phaser ratings of: [F]6[S]3[R]3
Torpedoratings of: [F]2[R]1
It has quantum torpedoes
Its speed in inches is: 15
Its maneuverability is: 130
Its total point cost is: 900
Notes:
Extra 3 shield points per turn.
Can shoot each torpedo tube twice.

The Vor'Cha class, Klingon Attack
Cruiser.
Hull rating of: 30
Shield Rating of: 11 .
Phaser ratings of: [F]10[S]5[R]3
Torpedo ratings of: [F]2[R]1
It has a cloaking device.
Its speed in inches is: 12
Its maneuverability is: 100
Its total point cost is: 600

The Akira class, USS Thunderchild.
Hull rating of: 30 .
Shield Rating of: 15 .
Phaser ratings of: [F]2[S]2[R]2
Torpedo ratings of: [F]10[R]5
It has quantum torpedoes
Its speed in inches is: 16
Its maneuverability is: 135
Its total point cost is: 713

The B'rel class, Bird of Prey.
Hull rating of: 10 .
Shield Rating of: 5 .
Phaser ratings of: [F]6[S]0[R]0
Torpedo ratings of: [F]1[R]0
It has a cloaking device.
Its speed in inches is: 18
Its maneuverability is: 190
Its total point cost is: 250

The D'Deridex class, Romulan
Warbird.
Hull rating of: 43 .
Shield Rating of: 21 .
Phaser ratings of: [F]6[S]2[R]1
Torpedo ratings of: [F]1[R]1
It has quantum torpedoes
It has a cloaking device.
Its speed in inches is: 12
Its maneuverability is: 100
Its total point cost is: 750

The Defiant class, USS Defiant.
Hull rating of: 11 .
Shield Rating of: 5 .
Phaser ratings of: [F]2[S]1[R]1
Torpedo ratings of: [F]2[R]0
It has quantum torpedoes
It has a cloaking device.
Its speed in inches is: 21
Its maneuverability is: 180
Its total point cost is: 273

The Galaxy class, USS Enterprise.
Hull rating of: 45 .
Shield Rating of: 22 .
Phaser ratings of: [F]5[S]3[R]3
Torpedo ratings of: [F]2[R]1
Its speed in inches is: 12
Its maneuverability is: 100
Its total point cost is: 845

The Galor class, Cardassian Warship.
Hull rating of: 12 .
Shield Rating of: 6 .
Phaser ratings of: [F]4[S]2[R]2
Torpedo ratings of: [F]1[R]1
Its speed in inches is: 15
Its maneuverability is: 120
Its total point cost is: 300

The Miranda class, USS Majestic.
Hull rating of: 15 .
Shield Rating of: 7 .
Phaser ratings of: [F]4[S]2[R]2
Torpedo ratings of: [F]2[R]2
Its speed in inches is: 15
Its maneuverability is: 100
Its total point cost is: 375

The Intrepid class, USS Voyager.
Hull rating of: 15 .
Shield Rating of: 7 .
Phaser ratings of: [F]5[S]3[R]3
Torpedo ratings of: [F]2[R]2
It has quantum torpedoes
Its speed in inches is: 18
Its maneuverability is: 150
Its total point cost is: 415

The Nebula class, USS Honshu.
Hull rating of: 33 .
Shield Rating of: 16 .
Phaser ratings of: [F]3[S]1[R]1
Torpedo ratings of: [F]2[R]1
Its speed in inches is: 15
Its maneuverability is: 100
Its total point cost is: 604

The Prometheus class, USS Prometheus.
(Ratings are for each sub section.)
Hull rating of: 20
Shield Rating of: 10 .
Phaser ratings of: [F]6[S]4[R]3*
Torpedo ratings of: [F]2[R]1*
It has quantum torpedoes*
Its speed in inches is: 15
Its maneuverability is: 150
Its total point cost is: 1600
Notes:
This ship splits into three equal sections
with the same ratings as above. All three
sections get captain bonus
